SUMMARY

Software Developer with a solid background in manual testing and a strong focus on building reliable, user-centered applications. Skilled in Laravel, front-end development, and UI/UX design, with experience creating responsive and intuitive interfaces. Proficient in developing technical road-maps and producing precise documentation to improve software quality, streamline workflows, and enhance team efficiency. Adept at bridging development and testing processes to deliver well-structured and maintainable systems.

WORK EXPERIENCE

Intermed LLC Corporation

February 2026 – May 2026

Software Developer Intern

- Built and maintained an HRIS Payroll System using Laravel, PHP, MySQL, JavaScript, HTML, and CSS
- Implemented payroll computation system including salary structure, overtime, deductions like SSS, PhilHealth, Pag-IBIG, tax, benefits, and payslip generation
- Designed and developed backend and frontend features including role-based access, payroll period processing, and reporting modules
- Improved UI/UX and applied mobile responsiveness across Payroll, Payslip, Government Contributions, and Settings modules
- Tested the system across web, mobile, and iOS devices to ensure functionality, responsiveness, and compatibility

Freelance Web Development

September 2025 – June 2026

Web Developer

- Created a fully responsive web application for student leaders of Urdaneta City University using PHP, HTML, CSS, JavaScript, and MySQL
- Built frontend and backend functionalities to support organization management, communication, and user accessibility
- Designed responsive user interfaces optimized for desktop and mobile devices
- Performed database integration, system testing, debugging, and deployment to ensure application performance and reliability
- Collaborated with student leaders to gather system requirements and implement functional improvements based on user feedback

EDUCATION

Urdaneta City University

August 2022 – June 2026

Bachelor of Science in Information Technology

- Service Awardee (University Level)
- Research Awardee (University Level)
- University Special Achievement Awardee
- Capstone Project: "InTraVa: A Multi-Platform VR Training Application for Learning Invasive Procedures" - Urdaneta City University, College of Health Sciences

PROJECTS

Human Resource Information System (HRIS)

February 2026 – May 2026

- Built a full-stack HRIS using Laravel and MySQL with payroll computation, government contributions (SSS, PhilHealth, Pag-IBIG and Withholding Tax), and role-based dashboards.

InTraVa: Multi-Platform VR Training App for Nursing Students

May 2025 – February 2026

- Developed a multi-platform VR training application using Unity , Laravel , and Flutter to teach nursing students invasive medical procedures through interactive virtual environments

USCentral Management System

September 2025 – June 2026

- Built a web-based student organization management portal for Urdaneta City University using PHP, MySQL, and JavaScript, supporting real-time communication and member management
